STAT

Dear Woody,

As you may have heard, I have disposed of my interests in [redacted] and have set up a new company which is known as [redacted], of which I am sole owner.

STAT  
STAT  
STAT

You are aware, also, of our extensive experience in development and production of highly precise mechanical and electromechanical military instruments, such as problem computers, trainers, mechanical servo systems, X and Y readers and plotters, and other types of precision gear. We are still in the internal combustion engine field and are now developing a 6-litre V-8 engine having 4 O.H. cams and developing 375 hp. If you desire further development work on the 2-stroke cycle engine generator which we designed, or plan to go into production, we should like the opportunity to quote.

We have a small plant, well equipped with new and modern precision machine tools. At this time we are soliciting business for model shop, experimental and production fabrication of small to medium units, assemblies and components. For the next several months, our engineering facilities are concentrated on the production design of a new machine which will be offered for sale to companies in the electronics and electrical field. Although we expect to be in production by June of this year, we shall continue to maintain at least fifty per cent of our facilities available to organizations such as yours who know the service and type of work I have offered in the past. We would greatly appreciate an opportunity to quote on any work which you may have in the future.

I would appreciate it if you would inform [redacted] of our new organization. If you or [redacted] come to Los Angeles at any time, please let me know. I would enjoy seeing you again.
